International application No. PCT/SG2006/000254

| Box No. II | Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet) | | | |
|--|---|--|--|--|
| This internative reasons: | ational search report has not been established in respect of certain claims under Article 17(2)(a) for the following | | | |
| 1. | Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely: | | | |
| 2. | Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically: | | | |
| | | | | |
| 3. | Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a) | | | |
| Box No. III | Observations where unity of invention is lacking (Continuation of item 3 of first sheet) | | | |
| This Interna | ational Searching Authority found multiple inventions in this international application, as follows: | | | |
| Claim 32 lacks unity. The only feature this claim has in common with the other independent claims is the plurality of epitaxial layers. However, this common feature is generic in the art. Consequently the common feature does not constitute a "special technical feature" since it makes no contribution over the prior art. Since there exists no other common feature which can be considered as a special technical feature, no technical relationship between the different inventions can be seen. Consequently the claims do not satisfy the requirement that they relate to one invention only. | | | | |
| 1. | As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims. | | | |
| | As all searchable claims could be searched without effort justifying additional fees, this Authority did not invite payment of additional fees. | | | |
| 3. | As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.: | | | |
| | No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: | | | |
| | | | | |
| Remark on | Protest The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee. | | | |
| | The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation. | | | |
| | No protest accompanied the payment of additional search fees. | | | |

Information on patent family members

International application No.

PCT/SG2006/000254

This Annex lists the known "A" publication level patent family members relating to the patent documents cited in the above-mentioned international search report. The Australian Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
